How to update SW for UHF5 model

Main F/W update

1. Ready USB
- Extract *.zip
- **Copy *.bin file to USB root path**(Do not copy *.zip file to USB Root Path)
- Recommend to use empty USB
- USB file system should be FAT32 format
(Please check this again when the USB not recognized on UHF5)

L-UHFMWWAC-1006.1.Zip →

Extract The latest version of UHF update image.

Copy L-UHFMWWAC-1006.1.Bin to the USB root path

Connect USB to the UHF5 model

2. Update SW on menu
- Main menu > Support > Software Update
- UHF5 device will search USB whether valid file exist or not
- Select OK for start update

3. Reboot automatically after SW update

STM32 F/W update

1. STM32 SW included on Main F/W. So doesn't need to ready separate FW.
2. Enter to Factory menu
- SVC > Upgrade > STM32 F/W upgrade
3. Wait message display during update

4. Reboot automatically after finish SW update
